ERGONOMIC OFFICE CHAIR

LESS MUSCLE FATIGUE

LESS CERVICAL AND LUMBAR STRAIN

LESS UPPER BODY TENSION

KEEPS YOUR BACK COOL

HEALTHY LEG CIRCULATION

Work Comfortably All Day

Long hours at a desk shouldn't compromise your physical well-being. This office chair combines breathable mesh with functional support structures to help ease daily muscle fatigue. By encouraging a properly aligned sitting posture, it provides a reliable solution to keep you comfortable and focused throughout the workday.

Reduces Neck and Shoulder Strain

Upper back stiffness often stems from fixed, unyielding seating. This headrest features an 8 cm height adjustment and a 40 degrees vertical rotation, letting you position the support right where your body needs it. By ensuring proper alignment for your head and neck, it helps reduce pressure on the cervical spine and minimizes shoulder tension.

Alleviates Lower Back Tension

Finding the right angle makes all the difference when tackling a demanding workload. With a versatile reclining range from 95 to 145 degrees, you can lean back comfortably during a phone call or stay upright while typing. The backrest design offers reliable lumbar support to help alleviate strain and minimize lower back tension.

Relieves Upper Body Fatigue

Holding your arms up all day while working can make your shoulders feel heavy and tense. The armrests provide a steady, fixed spot to rest your forearms between tasks, taking the weight off your upper body to relieve strain on your wrists and shoulders.

Promotes Healthy Leg Circulation

Keeping your feet flat on the floor is one of the easiest ways to sit better. With 9.5 cm of vertical travel, you can easily adjust the seat to match your desk height. It's a simple feature that helps keep your legs comfortable and promotes healthy circulation.

SPECIFICATIONS

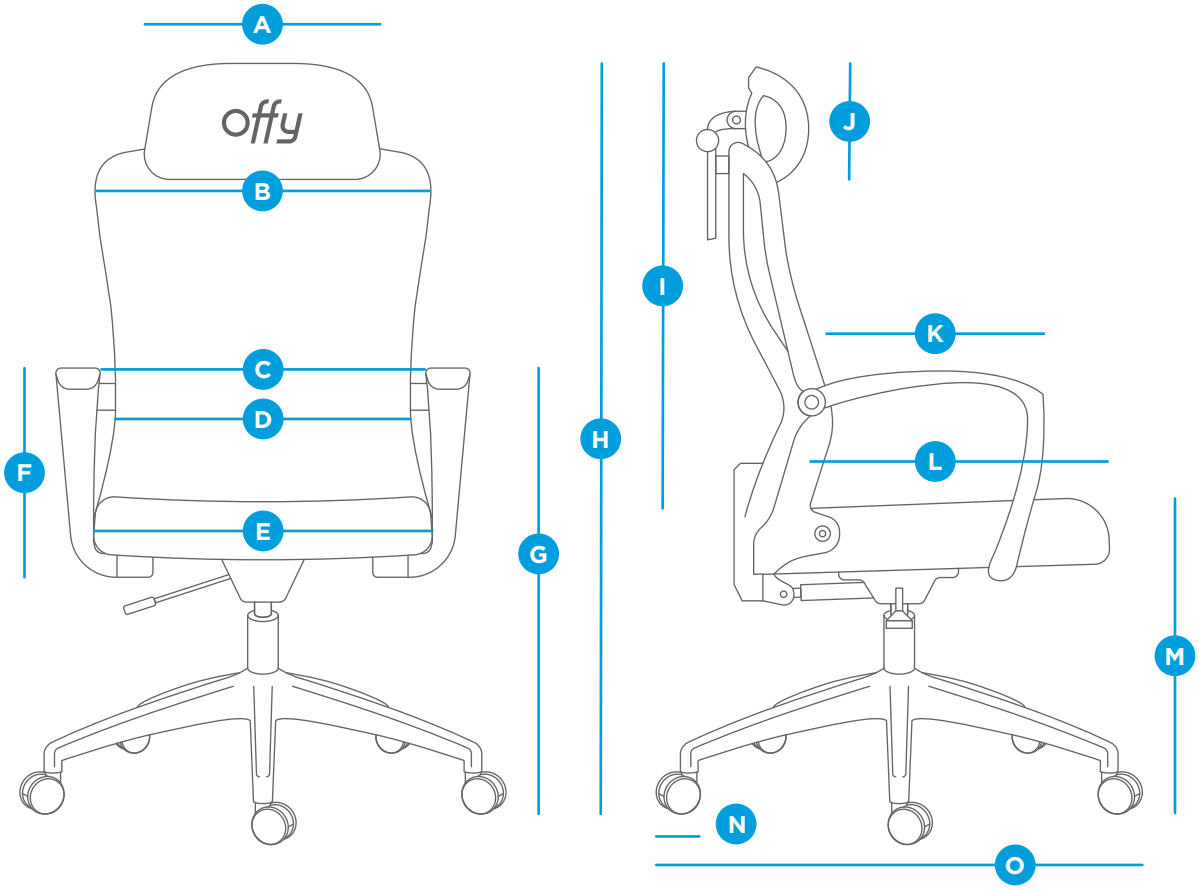

Maximum supported weight: 120 kg
Gas lift: Class 3
Headrest adjustment:
• 8 cm height
• 40 degrees vertical rotation
Backrest adjustment:
Static reclining 95 - 145 degrees
Seat adjustment: 9.5 cm height
