Professional video for every platform

Designed to work where you do, this webcam offers plug-and-play reliability across Windows, macOS, and Linux. Whether you are leading a presentation on Zoom, Teams or Meet, or broadcasting high-quality content via OBS and Twitch, the hardware combines your software for a smooth experience.

Uncompromising detail in every frame

Upgrade your digital presence with four times the resolution of standard HD. The 1/2.8" 8 MP sensor captures rich textures and vibrant colors, delivering professional-grade 2160p video. It provides the clarity needed for detailed demonstrations, sharp textures, and a lifelike image that stands out in a sea of grainy video feeds.

Stay sharp, even on the move

Eliminate blurry transitions with a focus system that reacts as fast as you do. Utilizing phase detection technology, the lens quickly locks onto subjects from 10 cm distance. This ensures your video remains crisp and professional during close-up product reveals or when you're moving naturally throughout a presentation.

Sound as clear as the picture

Communication is more than just video. The built-in microphone features automatic noise cancellation to isolate your voice from background distractions within a 3-meter range. With an accessible mute button, you maintain total control over your audio environment, ensuring you are heard only when you want to be.

Security you can see

Take full control of your digital workspace. The integrated physical privacy shutter provides a foolproof way to block the lens when the camera is not in use. It is a simple, effective solution for peace of mind, ensuring your private moments stay private without the need for messy stickers or software toggles.

Versatile setups for any desk

Achieve the perfect camera angle regardless of your workspace layout. The adjustable base securely grips any laptop or monitor, while the 1/4" threaded mount allows for quick attachment to the included mini tripod. This flexibility makes it easy to switch from a traditional eye-level meeting to a stable, tabletop setup for unboxings or tutorials.

SPECIFICATIONS

Supported resolutions: 2160p; 1920p; 1536p; 1080p; 1200p; 960p; 720p; 480p @ 30 fps

Sensor resolution: 8 MP

Sensor dimensions: 1/2.8"

Focus type: Phase detection automatic focus

Focus range: 10 cm – ∞

Lens material: 4G3P

Aperture: f/1.8

Focal length: 4.195 mm

Video encoding: MJPEG / YUY2

Image control:

- AEC (Auto Exposure Control)
- AWB (Auto White Balance)
- AGC (Auto Gain Control)

Diagonal field of view (dFoV): 90°

Built-in microphone: Yes (automatic noise cancelling)

Microphone range: 3 m

Connection: USB-A 2.0

Cable length: 1 m

Power supply: USB 5V

Privacy shutter: Yes

Mounting:

- 1/4" tripod
- Screen support

Dimensions: 60 x 40 x 70 mm (webcam)

Weight:

- Camera: 115 g
- Tripod: 35 g

Compatibility: Windows; macOS; Android; Linux

Package contents: Webcam; Mini tripod; 1m USB-A > USB-C cable
