PRYA

OFFICE CHAIR

LESS MUSCLE FATIGUE

LESS UPPER BODY TENSION

KEEPS YOUR BACK COOL

EASY HEIGHT COMFORT

Less Muscle Fatigue

Offy Prya utilizes a reliable ergonomic design to support your body throughout the workday. By encouraging the natural alignment of your spine, it helps manage day-to-day muscle fatigue and strain during office or study sessions.

Keeps Your Back Cool and Supported

Poor sitting posture is a primary cause of lower back discomfort. The lumbar support gently reinforces the lower spine to encourage a natural upright position. Paired with a breathable mesh backrest, it promotes steady airflow to prevent heat buildup, helping you stay physically comfortable.

Proper Height Comfort

Finding the right seat height is crucial for maintaining proper blood flow and relieving pressure beneath your thighs. The 9 cm vertical adjustment allows you to position the seat so your feet rest flat on the floor. This simple adjustment helps keep your knees and hips at a healthy, comfortable angle relative to your workspace.

Less Upper Body Tension

Continuous desk work can cause tension to ripple up into your upper body. The armrests provide steady support for your forearms, helping to distribute upper-body weight more evenly and taking the strain off your shoulders and neck during moments of focus.

SPECIFICATIONS

Maximum supported weight: 120 kg
Gas lift: Class 3
Seat adjustment: 9 cm height
Chair weight: 9.75 kg
Materials: Steel, nylon, polyurethane, polypropylene, fabric
